

Arcom

RACKS & STILLAGES

Leader in production of **TRANSPORT AND STORAGE SYSTEMS**

We specialise in production of portable racks, stillages and cages for warehousing and transport of various goods. Our solutions enable optimal utilisation of storage space. Arcom racks allow significant reduction of warehousing costs and thus contribute to a tangible increase in market competitiveness of our clients.

We offer our experience gained since 1996 and supported by modern technology.

Wide range of **RACKS, STILLAGES AND CAGES**

Arcom is open to customize the product to your needs. We support client's business by sharing our extensive expertise in the area of warehousing and production facilities.

Arcom makes sure to design safe, reliable and cost efficient solution serving for years.

Foldable racks for all kinds of PASSENGER CAR TYRES & WHEELS

Arcom has been offering solutions for warehousing and transporting tyres, rims and wheels for over 25 years. We manufacture steel pallets/racks and trolleys as well as special-purpose platform systems.

Our customers include tyre manufacturers, logistic companies, wholesalers, distribution networks and service workshops.

MEZZANINE SYSTEM

for tyre, wheel, rim and general cargo

Double the surface area of warehouses in a simple and cost-effective way. Quick and easy to assemble.

Mezzanine floors allow you to take maximum advantage of the height of premises, doubling the surface area.

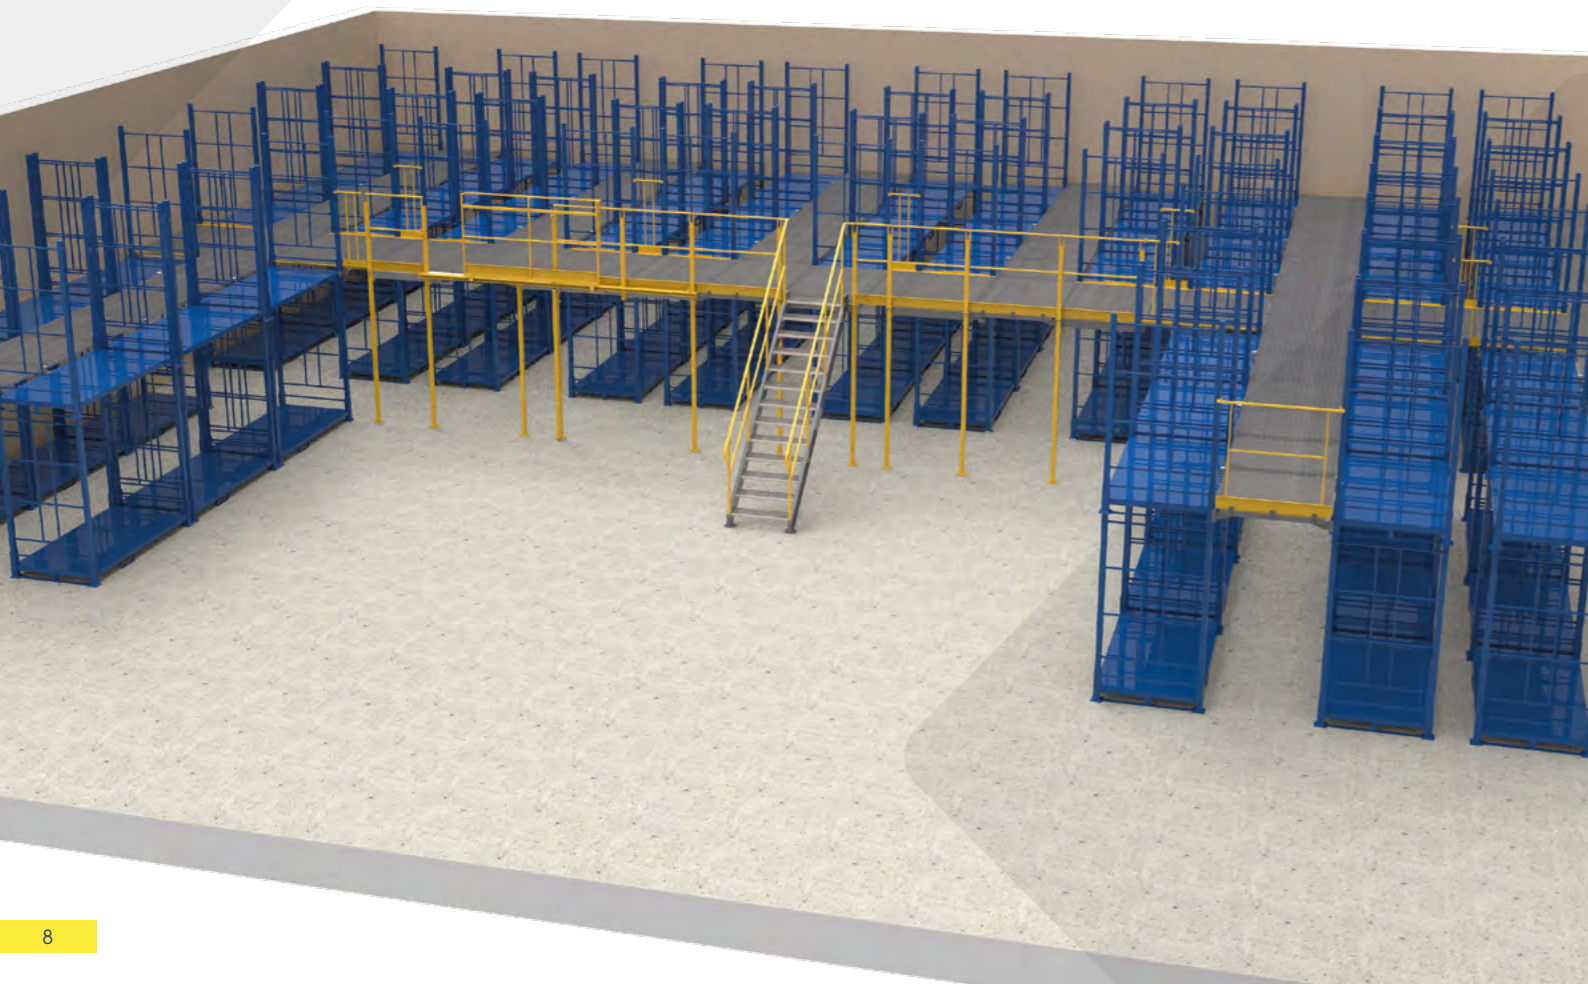

Mezzanines can be completely dismantled for reuse elsewhere, and their structure, dimensions and location are easy to modify. They can be installed throughout the whole warehouse or in certain areas.

PURPOSE

- Tyre & Wheel seasonal storage
- Tyre & Rims warehousing
- General cargo stocks
- Perfect back-up for internet shops

ADVANTAGES

- Increased extra floor space in industrial premises
- Multiplies your capacity
- Quick and easy to assemble without engineering work and special tools
- Can be complemented with a variety of Arcom racks
- Easy to relocate, expand and changes
- Strong, long - lasting material is used
- Good order and easy inventory checks

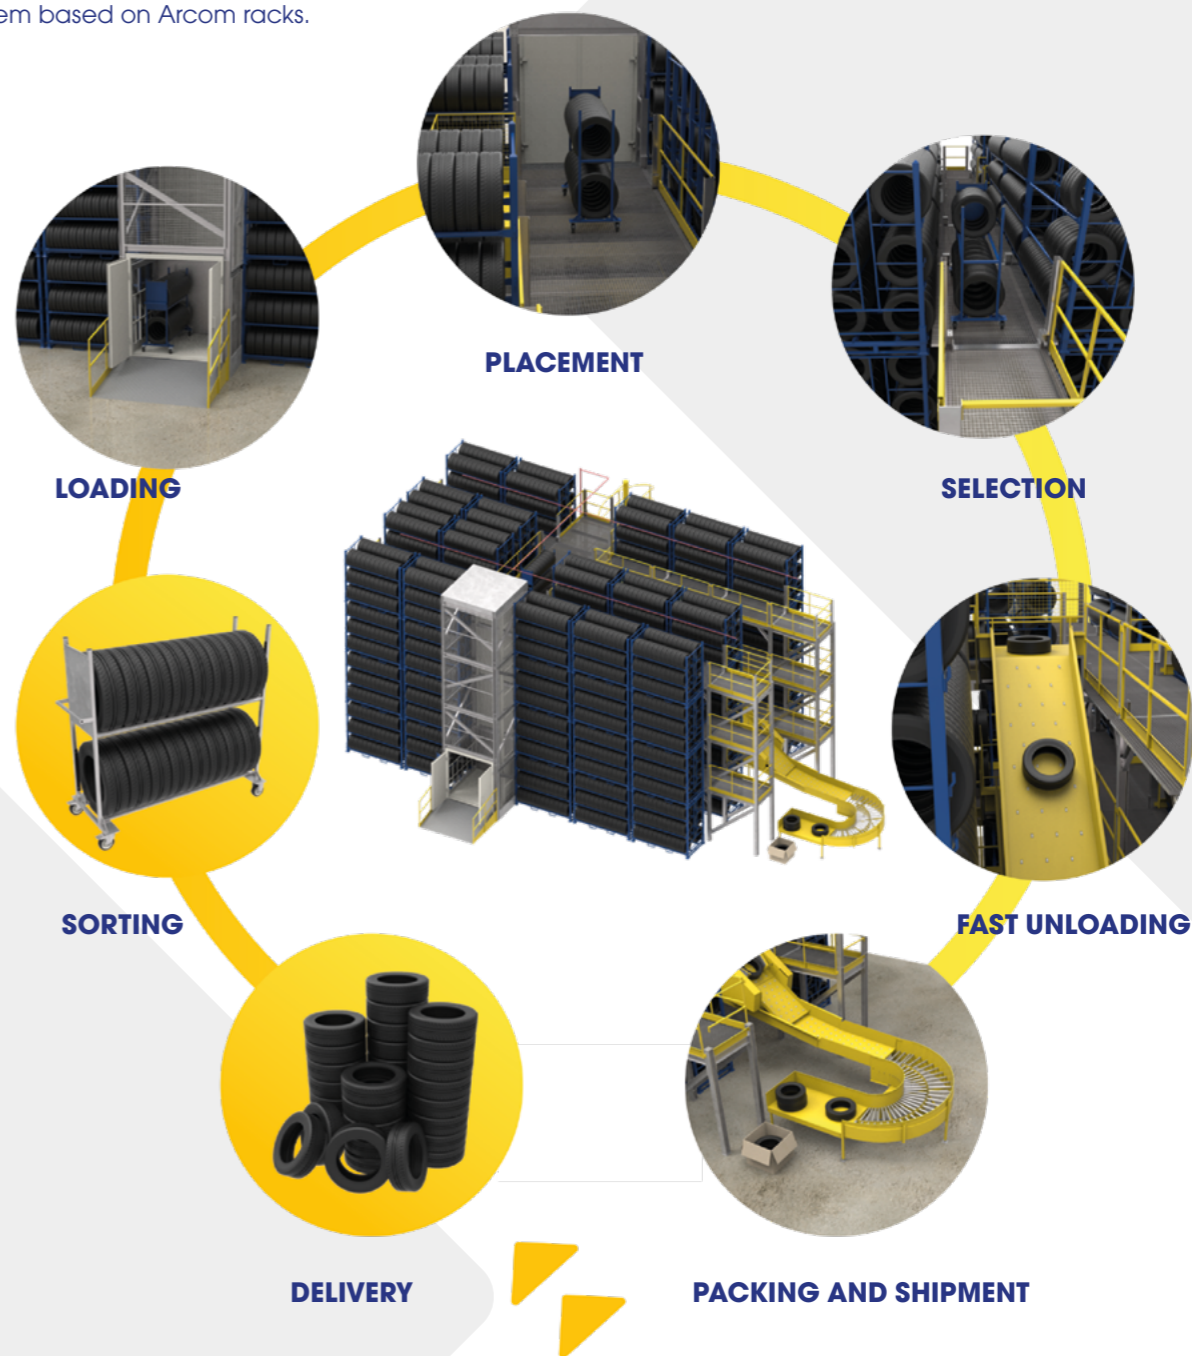

MULTILEVEL

Mezzanine System for Wheels & Tyres

FEATURES

- Stock increase by 30%.
- Full use of 5 to 11m high warehouses.
- Tyre racks in stack – up to 4.
- Quick unloading for e-commerce B2C
- Business model, seasonal hotels for wheels and tyres, etc.
- No forklift required.
- Easy inventory check.
- System based on Arcom racks.

Portable stillages FOR TRANSPORT AND STORAGE

Arcom's designing is always focused on the operational safety of the racks, reduction of costs, ergonomics and long-term functionality.

We are capable of building virtually any stillages used in the automotive industry. We keep high quality standards while the modern machinery (lasers, robotised welding stations) enables us to concentrate the entire manufacturing process within our plant. If needed, we equip the pallets with additional components, such as rubbers, plastics, etc.

FULLY WELDED FRAMES and special features of BOLTED DESIGN BY ARCOM

Portable stillages FOR TRANSPORT AND STORAGE

Steel pallets and cages, designated for storage and transport of gas cylinders. Solutions for LPG, technical and medical gases, as well as steel bundle frames.

We are aware of how important it is to transport gas safely and we are proud of long term business relationships with leading European gas producers and distributors, who in turn value our care of safety issues.

Quality **STEEL**

Arcom specialises in manufacturing of lightweight steel structures made largely of the S235JR and S355J2H steel grades. Our products are of **class EXC1** and **EXC2** according to **PN-EN 1090-1+A1:2012**.

The materials used come from selected and regularly audited suppliers. Each batch of steel is subjected to internal quality check.

Laser **CUTTING**

This technology stands for precision and cost efficiency. 100% repeatability of dimensions is of crucial importance for the stability of the racks and translates directly into the occupational safety of warehouse workers. High productivity of our lasers make us competitive in terms of price and production capacity.

Welding **EXPERIENCE**

At the heart of our technology is welding. The skills and experience of Arcom's employees are the source of our quality advantage. We carry out welding processes using world-class automatic machines.

Highly efficient robotic welding stations mean that we are able to deliver large quantities of racks & stillages in a short time.

Long lasting **COATING**

Whether paintcoated or galvanised our products will serve you for years. We have an automated powder coating plant and we apply Qualicoat certified coatings. Their enhanced adhesiveness to metals translates into long durability and increased corrosion resistance.

Galvanised coatings are made by professional subcontractors according to EN ISO 1461 and on the basis of the particular requirements of our customers.
